PROFESSIONAL SUMMARY

Senior Software Engineer with 10+ years of experience architecting AI-powered solutions and cloud platforms (Azure, AWS). Trusted leader known for mentoring teams, driving technical innovation, and delivering scalable, business-impacting systems. Passionate about bridging AI, cloud, and data to solve complex business challenges

WORK EXPERIENCE

KARGO, NYC, USA

Aug 2025 – Present

Senior Software Development Engineer

Led an Ad Tech team of six engineers, delivering innovative ad generation solutions.

- **Skills/Technologies used:** React, Express.js, MySQL, AWS, Docker, K8s
- Spearheaded AI-driven image generation, enhancing creative quality and speed.
- Incorporated LLMs to dynamically generate personalized ad copy, boosting engagement.
- Led an authentication project for cross domain multi-application using Okta, Unified multiple applications to deliver a seamless single-app experience
- Directed a team in implementing CI/CD pipelines with GitHub Actions to deploy images to ECR, and orchestrated rollouts via Argo CD, reducing deployment times by 35%.
- Designed and implemented personalized ad templates that adapt to user behavior, increasing CTR by 10%.

MICROSOFT, NYC, USA

June 2022 – July 2025

Senior Software Development Engineer

Managed and mentored team of 4 software engineers. Fostered career growth and technical excellence among junior engineers, which resulted in one team member earning a promotion.

- **Skills/Technologies used:** Cloud Services (Azure Functions, Pipelines, Storage, Data Explorer), DevOps (CI/CD), Python, Database System (Kusto, Cosmos DB), On-call ICM Alarming system
- Mentored a team, fostered career growth and technical excellence among junior engineers, which resulted in one team member earning a promotion.
- Drove quarterly product initiatives(one-pager) from ideation to launch, partnering with senior leadership to define long-term technical roadmaps and system architecture
- Developed a data pipeline that fetches data from multiple sources, enables custom filtering based on requirements, and pushes structured data into Azure Data Explorer, empowering stakeholders with real-time insights.
- Spearheaded the development of a retailer onboarding tool. Streamlined processes which resulted in reducing onboarding time by thirty percent and increasing the retailers onboarded per quarter by twenty percent.
- Collaborated with cross-functional teams to redesign APIs, reducing load times by 10%.

AMAZON WEB SERVICES, Seattle, USA

May 2020 - June 2022

Software Development Engineer

Worked in [AWS Calculator](#) team that provided tool for estimating cost of 100 AWS services/traffic of 1M daily requests.

- **Skills/Technologies used:** Cloud Services (AWS S3, Route 53 and CloudFront), Frontend (JavaScript, React, Redux), Nodejs, DevOps (CI/CD), Infrastructure as Code: CloudFormation
- Worked in a critical, customer facing fast-paced team. This enabled me to wear various hats such as and not limited to conducting design reviews, reviewing other important project designs, greatly improving operational load, recruitment, etc. along with writing reliable code at Amazon scale. Used JavaScript, React, AWS S3 and CloudFront.
- Developed re-usable React components & Higher-Order Components leveraged by multiple calculators and implemented application state management using Redux.
- Implemented an Infrastructure as a Code system to automate the deployment pipeline using Route 53, S3 Bucket, CloudFront, using CloudFormation templates.

- Implemented a real time monitoring and alarming solution that monitors performance metrics of AWS calculator and triggers an alarm during outages.

GCOM SOFTWARE, Albany, NY

May 2016 - May 2020

Software Developer, June 2017 - May 2020

Built trust in team by delivering full end-to-end features, showed project management skills, & team camaraderie by mentoring new employees, reviewing architecture designs, performing code reviews & providing support for features.

- Designed & developed the core functionalities of ASP.NET MVC web application and WPF Desktop application.
- Developed data layer using Entity Framework, ADO.NET, and LINQ.

GCOM SOFTWARE, continued

Software Developer Intern, May 2016 - December 2016

Developed award-winning Native Android application for NY State (NYC Parking Ticket Pay or Dispute) which supported multiple languages using MVC Architecture.

- Achieved rating of 4.7 out of 5 stars on the play store.

ACCENTURE, Mumbai, India

July 2014 - July 2015

Associate Software Engineer

Developed an insurance service portal for a leading insurance provider.

- Created & maintained reports using Crystal Reporting tool & Developed SQL-queries for backend database system.

EDUCATION

Master of Science in Information Technology & Management

Aug 2015 - May 2017

The University of Texas at Dallas

Bachelor of Science in Information Technology

Aug 2010 – May 2014

University of Mumbai

AI PROJECTS

Automated Twitter Bot (OpenAI / Ollama + Twitter API)

- Built a Python bot that posts daily motivational quotes to Twitter using OpenAI's API for content generation, scheduled via CRON jobs and integrated with the **Twitter API** for automated publishing
- GitHub: [Automated Twitter Bot](#)

AI Agent Project: Context-Aware Voice AI Assistant (RAG) - Company Hackathon

- Developed a voice AI agent using Amazon Lex, integrating retrieval-augmented generation (RAG) to combine company-specific data from databases and documents with real-time context from the LLM.
- Implemented features that enable the agent to provide accurate, context-aware responses by retrieving relevant company data and enhancing interaction quality.
- Leveraged the latest large language models to ensure that the agent's responses are informed by both up-to-date real-time context and comprehensive company data.

Voice AI Agent (RAG-Enabled Conversational AI)

- Implemented Retrieval-Augmented Generation using enterprise data to produce context-aware responses
- Built a modular voice AI agent enabling real-time speech conversations via Speech to Text, Large Language Model, Text to Speech pipeline.
- GitHub: [Voice AI Agent](#)

Certifications

[**AWS Certified Machine Learning – Specialty**](#)
